Education

Florida International University Bachelor of Science in Computer Science	Aug. 2024 – Dec. 2026
Google Tech Exchange , Accelerated Skills Program Received direct mentorship from Google engineers, developing industry-level software engineering skills.	Jan. 2025 – May 2025

Technical Skills

Languages: Java, JavaScript, Python, C/C++, Swift, TypeScript, SQL, HTML, CSS, Bash/Shell
Technologies: Git, CI/CD, Linux/Unix, Node, React/Next.js, Springboot, PostgreSQL, Flask, FastAPI, Streamlit, Azure DevOps, Google Cloud Platform, Docker

Experience

Software Engineering Intern (BTT Sprinternship) UKG (Ultimate Kronos Group)	May 2025 - June 2025 <i>Weston, Florida</i>
- Worked in an Agile team to build an AI-powered internal tool that helps managers identify skill gaps and recommend development paths using real-time employee competency data. - Built the tool using a Java Spring Boot backend integrated with the OpenAI API, a PostgreSQL database containerized with Docker, and a responsive frontend built with React and Next.js.	

Front-End Engineer Law Detail	March 2024 – Aug. 2024 <i>Miami, Florida / Remote (Hybrid)</i>
Developed the frontend using React and TypeScript, creating responsive pages and components that allowed legal professionals to easily explore court case data. Integrated dynamic filtering and search tools (sex, race, age, incarceration time, sentence length, etc.) by connecting the UI to backend APIs, enabling users to refine and analyze large datasets in real time. Built interactive dashboards and data visualizations with ReCharts, transforming complex legal and demographic information into clear charts and graphs that improved insight discovery and decision-making.	

Computer Science Tutor & Lab IT MDC School of Engineering and Technology	Jan. 2023 – Present <i>Miami, Florida</i>
Mentored over 150 students in Java, Python, and C++, assisting with projects, homework, and exam preparation, on average improving student grades by 20%.	

Competitions

2025 ShellHacks Winner , Team PrepBear	devpost.com/software/prep-bear
Awarded wins in two separate company challenges — Assurant and Microsoft — for building PrepBear.	
2024 ShellHacks Winner , Team Financio	devpost.com/software/financio-xg15bp
Won Vanguard's category in "Increasing Financial Literacy" at Florida's largest hackathon, with 1,400 participants.	

Projects

PrepBear <i>React, Tailwind CSS, TypeScript, Google Gemini Live API</i>	prepbear.app
- An AI-powered interview prep platform that simulates behavioral and technical interviews to help students and jobseekers practice and gain confidence. - Integrated real-time voice interviews using Google Gemini Live API, providing feedback on tone, delivery, and answer quality. - Developed a company research tool that extracts insights from company websites to help applicants tailor their answers and demonstrate genuine interest.	
Study Buddy <i>React Native(Expo), FastAPI, PostgreSQL, Docker</i>	github.com/KristianCorrea/study-buddy-mobile
- Built a gamified study companion app where users scan textbook pages to generate AI-powered quizzes, earning XP to level up a virtual pet. - Engineered a scalable FastAPI backend with PostgreSQL for user accounts, quiz storage, and pet progression, deployed on Google Cloud Run. - Integrated OCR + OpenAI LLMs to convert textbook pages into interactive quizzes, ensuring personalized learning experiences. - Developed a mobile-first interface with React Native (Expo) including pet dashboard, virtual bookshelf, and quiz-taking flow.
