Education

- Florida International University**, *BS in Computer Science* Aug 2024 - May 2027
- **Relevant Coursework:** Programming I & II, Data Structures & Algorithm Techniques, Computer Architecture
 - **Activities:** Break Through Tech, INIT, ColorStack, Society of Hispanic Professional Engineers (SHPE)
- Google Tech Exchange**, *Technical Program* Jan 2025 - May 2025
- **Selected from 1,500+ candidates** to receive technical mentorship and software engineering coaching.
 - **Courses:** Algorithm & System Design, Introduction to Software Engineering, and Careers in Tech

Skills

Languages: Java, JavaScript, TypeScript, Python, C/C++, Swift, SQL, Bash/Shell
Technologies: Git, CI/CD, Linux/Unix, Node, React/Next.js, Flask, DevOps, Google Cloud Platform, Docker, Wordpress

Experience

- Florida International University (KFSCIS)** Feb 2026 - Apr 2026
Full-Stack Development Instructor
- Selected as one of **10 facilitators** for the Advanced Web Development track in the Break Through Tech Sprinternship program, teaching **25-30 students** through a 7-week intensive.
 - **Created course curriculum** and mentored students in **full-stack web development**, preparing them for their **matched internships** through hands-on projects and industry-focused technical training.
- UKG (Ultimate Kronos Group)** May 2025 - Jun 2025
Software Engineering Intern (BTT Sprinternship)
- **Built an AI-powered internal tool** that helps managers identify skill gaps and recommend development paths using real-time employee competency data.
 - Built the tool using a **Java Spring Boot backend** integrated with the **OpenAI API**, a **PostgreSQL database** containerized with **Docker**, and a responsive frontend built with **React and Next.js**.
- Law Detail** Mar 2024 - Aug 2024
Front-End Engineer
- **Developed the frontend using React and TypeScript**, creating responsive pages and components for legal professionals to explore court case data.
 - **Integrated dynamic filtering and search tools** by connecting the **UI to backend APIs**, enabling users to refine and analyze large datasets in real time.
 - **Built interactive dashboards and data visualizations** with ReCharts, transforming complex legal and demographic information into clear charts and graphs.
- Miami Dade College** Jan 2023 - Present
Computer Science Tutor & Lab IT
- Mentored **over 150 students** in **Java, Python, and C++**, assisting with projects, homework, and exam preparation, on average **improving student grades by 20%**.

Projects

- PrepBear** - *React, Tailwind CSS, TypeScript, Google Gemini Live API* prepbear.app
- An AI-powered **interview prep platform** that simulates behavioral and technical interviews to help students and jobseekers practice and gain confidence.
 - Integrated **real-time voice interviews** using **Google Gemini Live API**, providing feedback on answer quality.
- AI Search Lab** - *React, TypeScript, Tailwind CSS, Vite* ai-search-lab.kristiancorrea.dev
- An interactive **AI search visualization** platform that compares search algorithms on an 8-puzzle and Tic-Tac-Toe.
 - Implemented **BFS, Dijkstra, A (Manhattan heuristic), Minimax, and Alpha-Beta pruning** with live metrics for nodes expanded, runtime, and pruning rate.
